

# **Std Cost estimation Planning**

**Created By** 

Balamari P (FICO Consultant)

+916381572600

## **Overview**

This document is intended to explain how to calculate a standard price for materials with price control S: When you mark the standard cost estimate, the result of the cost estimate is written to the costing view of the material master record as the future standard price

In The meantime Once Price will be released in the std cost estimation, the system will update a Current price of the material Master.

## Standard cost estimation Transaction code-CK11N

In this transaction code we have to mark price as std cost estimation for the materials.

- Costing Variant-PPC1 (It determine the how a cost estimate is performed and valuated)
- Costing version-Number that serves to differentiate between cost estimates for the same material.
